

MDTS, LLC.

CAPABILITY STATEMENT

Core Competencies

Communications Technology | Aerial Services

- Decommission, installation, integration, maintenance, troubleshooting, and alarm resolution for:
 - Microwave networks
 - Wireless carrier communication networks
 - Obstruction lighting systems
 - Small-cell sites
 - VOIP networks
 - Security and surveillance systems
 - Networking and server infrastructure
- Aerial access and rigging services up to 600' for:
 - Monopole, self-support, guyed, and portable/temporary "COW" towers
 - Special access areas: stealth towers, water tanks, and rooftops
- Cell site compound maintenance, repair, and snow removal
- Cell site DC power shelf upgrades, battery installation, and civil construction services
- Optical fiber splicing, connectorization, cable deployment and placement, field construction, turn-up, testing, and troubleshooting

Differentiators

Technical Expertise | Project Management

- Telecommunications Tower, Wireless, and Fiber Optic Technicians trained through the DoL approved Telecommunications Industry Registered Apprenticeship Program (TIRAP)
- Nokia Wavence 19 Installation and Test Technician SME certified staff
- Flash Technology Qualified Service Provider
- ANSI accredited, National Wireless Safety Alliance (NWSA) certified staff
- Employer participant in the NATE-OSHA-FCC Strategic Partnership
- NATE STAR Initiative Safety Audit Documentation process
- EOS process management

Professional Associations

- NATE: Communications Infrastructure Contractors Association
- Michigan Wireless Association (MWA)
- Warriors 4 Wireless (W4W)
- Wireless Industry Network (WIN) Speakers Bureau
